SKILLS

Frontend Development

React.js, React Native, Next.js, Redux, TypeScript, Tailwind CSS, Material-UI (MUI), Framer Motion, Vite

Backend Development

Node.js, Express.js, RESTful APIs, Socket.io, Webhooks (HMAC), Microservices, Python (Django)

Database

MongoDB, PostgreSQL, MySQL, Redis, SQLite

DevOps & Tools

Git/GitHub, Docker, AWS (Introduction), Firebase, Vercel, Google Maps API, Paystack/Moniepoint APIs

Core Concepts

SaaS Architecture, CI/CD, Agile/Scrum, System Design, Multi-Tenant Systems, Real-time Communication

EDUCATION

B.ENG (Hons)

Mechanical Engineering
University of Ilorin — 2017

Innovative and results-driven **Senior Full Stack Developer** with extensive experience designing, developing, and deploying scalable Fintech applications, SaaS platforms, and enterprise solutions. Expert in the **MERN stack** and **React Native**, with a strong focus on performance optimization, bank-grade security, and clean, maintainable architecture. Proven track record of delivering mission-critical systems with complex workflow automations.

FEATURED PROJECTS

Moprosper — FinTech Mobile App

Available on PlayStore

Lead Full Stack Developer

- Engineered a high-yield investment platform featuring secure vaults for Gold, Real Estate, and Treasury Bills, empowering users to preserve wealth and achieve financial growth.
- Implemented bank-grade security protocols including advanced encryption and a rigid KYC/Identity Verification system to ensure data integrity and user trust.
- Developed a comprehensive wallet management system with real-time interest calculation of up to 20% APY, ensuring accurate and transparent financial tracking.
- Integrated seamless utility payments for airtime, power, and cable alongside a robust referral and rewards system to drive user engagement and retention.

moprosper.com

Tech: React Native, Node.js, Express.js, MongoDB, Redux, Paystack API, Firebase

CERTIFICATIONS

- Django Framework — Coursera
- Full Stack Web Development — Bluescripts
- Web & Graphics Design — Douglos Institute

9thWaka — Night Logistics Platform

Live Pilot

Full Stack Developer

- Developed an innovative AI Safe Route System that analyzes route data to calculate the safest and best-lit paths for secure night-time deliveries.
- Implemented critical safety features including real-time GPS tracking with live ETA updates and an instant Emergency SOS Button connected to a 24/7 control room.
- Built a comprehensive dual-app ecosystem for Customers and Riders featuring in-app chat, voice notes, and a Night Mode Bonus system to incentivize rider availability.
- Created a sophisticated Vendor Management System and Scheduled Night Delivery features to streamline operations and logistics planning.

9thwaka-landing.vercel.app

Tech: React Native, Node.js, Socket.io, Google Maps API, MongoDB

Zamani Capital — FinTech Ecosystem

Live

Full Stack Developer

- Designed a sophisticated multi-factor credit scoring engine that evaluates user creditworthiness using bureau data, income analysis, and behavioral patterns.
- Implemented a complex Three-Wallet System separating Main, Loans, and Savings funds to provide users with granular control over their finances.
- Built specialized role-based dashboards for Field Officers, Risk Officers, and Operations teams, complete with automated compliance tracking and reporting tools.
- Automated the entire loan application lifecycle from ongoing repayment tracking to final settlement, enhancing operational efficiency.

Tech: React, React Native, Node.js, Express.js, MongoDB

ELRA ERP — Federal Ministry of Finance

Deployed & Active

Full Stack Developer

- Delivered a mission-critical ERP system comprising 12 comprehensive modules including Finance, HR, Procurement, Projects, and Legal management.
- Unified fragmented inter-departmental workflows to automate compliance tracking and fully digitize operations for the Equipment Leasing Registration Authority.
- Designed a robust Role-Based Access Control (RBAC) architecture to ensure strict data security and appropriate access levels across all government departments.
- Implemented seamless data synchronization and reporting pipelines to provide real-time insights into departmental performance.

elra-erp.onrender.com

Tech: React, Node.js, Express.js, MongoDB

SmartInvoice — SaaS Platform

Live

Lead Full Stack Developer

- Architected a scalable Multi-Tenant SaaS solution designed to handle complex subscription billing and invoicing for diverse business clients.
- Implemented a secure webhook orchestration system using HMAC signatures to reliably sync data and access rights across external client applications.
- Built advanced features for automated professional invoice generation compliant with Nigerian tax regulations, support for outright software sales, and comprehensive audit logging for transparency.

- Developed a resilient payment pipeline handling initial subscriptions, renewals, and upgrades with automated email notifications.

Tech: Node.js, Express.js, MongoDB, Paystack Webhooks, EmailJS

School Bill Management System (SBMS)

Live

Full Stack Developer

- Implemented a robust Multi-Tenant Architecture that ensures strict data isolation and security for multiple educational institutions on a single platform.
- Automated critical financial workflows including payment reminders, instant PDF receipt generation, and comprehensive expense management.
- Developed interactive, real-time financial analytics dashboards giving Bursars and Administrators deep insights into revenue and outstanding payments.
- Created a seamless student and academic management interface for handling terms, classes, and fee assignments efficiently.

sbms.digitalentshub.net

Tech: React 19, Tailwind CSS 4, Node.js, Express 5, Socket.io

Payroll Management System (PMS)

Live

Full Stack Developer

- Automated complex Nigerian Tax Compliance calculations for PAYE, Pension, NHF, and NSITF, reducing manual errors and ensuring regulatory adherence.
- Built an intuitive Employee Self-Service Portal allowing staff to easily retrieve payslips and manage personal data, reducing HR administrative overhead.

- 
- Developed flexible plan-based approval workflows and a template management system to accommodate various organizational payroll structures.
 - Enabled comprehensive multi-organization support with bulk CSV import/export capabilities for efficient data handling.
