Portfolio: <https://portfolio-snowy-mu-55.vercel.app>

Professional Summary

Senior Full Stack MERN Developer with over 4 years of experience delivering high-performance enterprise and government-scale solutions. Expert in architecting secure G2B platforms, including the Federal Ministry of Finance (ELRA) Vendor Portal and the NLSEE 2026 Summit ecosystem for Nigeria's ₦5.2 Trillion equipment leasing sector.

Specialized in building scalable architectures, integrating secure financial pipelines (Paystack/HMAC), and managing full-cycle DevOps infrastructure via VPS/aaPanel. A results-oriented leader with a proven track record of reducing system latency by 50% and increasing user engagement by 25% through UX-centric engineering and technical mentorship.

Professional Experience

Lead Full Stack Developer

NLSEE 2026 | National Leasing Summit & Equipment Expo
January 2026 – March 2026

Project Context: Engineered the primary digital infrastructure for Nigeria's premier Equipment Leasing Summit, orchestrating complex high-value registrations for a ₦5.2 Trillion national economy sector.

Key Achievements:

- **Architected a Sophisticated Multi-Tier Registration Engine** designed to handle diverse stakeholder workflows (Government, Corporate, and Individual), featuring dynamic validation logic and state-persistent form architectures.
- **Deployed a Secure Digital Ticketing & Real-Time QR Verification Ecosystem**, including automated PDF e-ticket generation via **jsPDF** and a high-velocity **On-site Verification Portal** for instant security clearance.
- **Orchestrated an Automated Financial Pipeline** integrating the **Paystack API** with robust **Webhook listeners**, delivering a 100% automated invoicing and workflow with zero-reconciliation overhead.
- **Engineered a Dedicated Field-Scanning Hub** for summit staff, significantly reducing physical bottlenecks and attendee wait times through high-performance mobile-optimized verification tools.
- **Developed a Premium, High-Retention UI/UX** using **React 19** and **Tailwind CSS 4**, ensuring a state-of-the-art interactive experience for industry policymakers and high-net-worth investors.

Technologies: React 19, Vite, Tailwind CSS 4, Node.js, Express 5, MongoDB, Paystack API, jsPDF, QRCode, Framer Motion, aaPanel, Bitwise SSH, VPS Hosting

Full Stack Developer

ELRA Vendor Portal | Equipment Leasing Registration Authority (ELRA)
February 2026 – March 2026

Project Context: Engineered a mission-critical Government-to-Business (G2B) ecosystem for the Equipment Leasing Registration Authority (ELRA), automating procurement and compliance for national vendors.

Key Achievements:

- **Architected a Unified Vendor Onboarding System**, supporting multi-tiered registration for Individual and Corporate entities, featuring automated validation for mandatory government credentials (CAC, Tax Clearance).
- **Deployed a Transparent Digital Bidding Marketplace (RFQ)**, digitizing the electronic bid submission process and ensuring a tamper-proof audit trail for government contract awards.
- **Engineered a High-Performance Contract Lifecycle Management (CLM) Hub**, enabling real-time monitoring of project delivery milestones, payment visibility, and performance tracking across the federal vendor network.
- **Implemented a Secure Vendor Dashboard Architecture**, providing high-net-worth business owners and government administrators with centralized access to compliance status and payment tracking.
- **Managed Government-Grade Infrastructure Orchestration**, deploying the platform on a secure private VPS using **aaPanel** and **Bitwise SSH**, maintaining 99.9% uptime and zero-security-leak integrity.
- **Ensured 100% Adherence to FGN Procurement Standards**, architecting the system with strict data security, JWT-based sub-sessions, and audit logging for absolute transparency.

Technologies: React, Node.js, Express.js, MongoDB, Tailwind CSS, Framer Motion, JWT Security, FGN Procurement Standards, aaPanel, Bitwise SSH, VPS Hosting

Lead Full Stack Developer

Alertpro | Alertpro AI
January 2026 – Present

A cutting-edge, real-time intelligence and broadcast platform designed to eliminate the noise of the modern digital landscape. It continuously scans the web, APIs, news feeds, social media, and private data sources to detect high-impact signals and instantly delivers them to users via WhatsApp, SMS, Email, App Push, and In-App feeds.

Key Achievements:

- Developed Intelligent Monitoring Engine with multi-source scanning and automated scrapers
- Implemented Smart AI Filtering powered by Gemini to reduce noise and score urgency
- Architected Multi-Channel Delivery system (WhatsApp, SMS, Email, Push Notifications)
- Built usage-based Wallet & Billing System with Paystack and Flutterwave integration
- Engineered real-time alert tracking and data extraction engines

Technologies: React, Vite, Tailwind CSS, Framer Motion, Socket.io, Firebase (FCM), Node.js, Express.js, MongoDB, Redis, Gemini AI, Node-cron

Live Link: alert-pro.onrender.com

Frontend Developer (Contract)

JetOut Experience | Gurugeeks Royalty Limited
May 2025 – July 2025

Built a comprehensive event planning and booking platform where users can discover, plan, and book experiences, parties, and events. The platform enables event discovery (like events coming to Lagos, Nigeria), ticket purchasing, and a full merchandise store where users can buy party wearables and items to take home. Also developed a complete admin dashboard for managing events, bookings, merchandise inventory, and orders.

Key Achievements:

- Developed event discovery and search functionality with advanced filtering
- Implemented ticket booking system with interactive booking flows
- Built complete merchandise store with checkout and payment integration
- Created comprehensive admin dashboard for event, booking, inventory, and user management
- Ensured responsive design across all devices

Technologies: React, Vite, Tailwind CSS, React Hook Form, RESTful APIs, Toastify, Git/GitHub

Full Stack Developer

Zamani Capital | Zamani Capital
In Progress

A digital financial services platform (web and mobile) that provides lending and savings solutions. Enables customers to apply for loans, manage savings, and handle financial transactions through a comprehensive wallet system. Features a multi-factor credit scoring system that evaluates customers using bureau data, KYC verification, income analysis, alternative data sources, and behavioral patterns from repayment history.

Key Achievements:

- Developed loan application system with multi-factor credit scoring
- Implemented savings accounts with interest tracking
- Built three-wallet system (Main, Loans, Savings) for comprehensive financial management
- Created role-based dashboards for Field Account Officers, Risk Officers, and Operations Management
- Implemented real-time notifications and automated workflows
- Ensured compliance tracking and comprehensive reporting & analytics

Technologies: React, React Native, Node.js, MongoDB, Express.js, MERN Stack

Full Stack Developer

School Bill Management System (SBMS) | SBMS
Production Ready

A comprehensive full-stack web application designed to streamline financial operations for educational institutions. Enables schools to efficiently manage student billing, payments, expenses, and financial reporting through an intuitive, role-based interface. Features multi-tenant architecture, Paystack payment integration, real-time notifications, and comprehensive analytics.

Key Achievements:

- Implemented multi-tenant architecture for multiple school support

- Developed role-based access control (Admin, Bursar, Student)
- Integrated Paystack payment gateway for seamless payment processing
- Built comprehensive bill management and assignment system
- Created student and academic management (Terms, Classes)
- Implemented financial analytics & reporting with Recharts
- Developed real-time notifications using Socket.io
- Automated payment reminders and receipt generation (PDF)
- Enabled report export in multiple formats (PDF, Excel, CSV)

Technologies: React 19, Vite, Tailwind CSS 4, Node.js, Express 5, MongoDB, Socket.io, Paystack API, JWT, Framer Motion, Recharts, jsPDF

Live Link: sbms-2z2m.onrender.com

Full Stack Developer

Payroll Management System (PMS) | PMS

In Progress

A comprehensive cloud-based SaaS payroll solution designed to automate and streamline payroll processing for organizations of all sizes. Eliminates manual payroll calculations, ensures compliance with Nigerian tax regulations (PAYE, Pension, NHF, NSITF), and provides real-time insights through role-based dashboards. Features automated payroll processing, template management, multi-level approval workflows, and employee self-service portal.

Key Achievements:

- Developed automated payroll processing system
- Implemented template management system for flexible payroll configurations
- Built comprehensive employee management system
- Ensured tax configuration & compliance with Nigerian regulations
- Created plan-based approval workflows
- Developed role-based dashboards with real-time notifications (Socket.io)
- Implemented multi-organization support with SaaS subscription management
- Built employee self-service portal
- Enabled CSV import/export and PDF generation

Technologies: React.js, Node.js, Express.js, MongoDB, Socket.io, JWT, PDF Generation, CSV Processing, SaaS Architecture

Full Stack Developer

TechXtro Store | TechXtro Store

Production Ready

A modern, responsive e-commerce platform specializing in tech products, fashion, and lifestyle items. Built with a focus on performance, user experience, and seamless payment processing. The platform features a comprehensive product catalog with categories for Men, Women, Jewelry, and Gadgets, integrated Paystack payment gateway for secure transactions, and a sophisticated dark/light mode theme system for enhanced user comfort.

Key Achievements:

- Developed comprehensive product catalog & management system
- Implemented shopping cart & checkout functionality
- Integrated Paystack payment gateway for secure transactions
- Built sophisticated dark/light mode theme system
- Created user authentication & profiles
- Developed order management & tracking system
- Integrated EmailJS for automated email notifications
- Implemented product search & filtering with category-based navigation
- Ensured responsive design across mobile, tablet, and desktop
- Used Redux for state management and MUI for modern UI components
- Implemented smooth animations with Framer Motion and Toast notifications

Technologies: React, Redux, Tailwind CSS, Material-UI (MUI), Paystack API, EmailJS, React Toastify, Framer Motion, Node.js, Express.js, MongoDB, RESTful APIs

Live Link: techxtrostore.vercel.app

Frontend Developer (Client Project)

Skill Kernel | Skill Kernel

Production Ready

A dynamic, responsive educational platform template designed for course providers and learning institutions. Built with vanilla HTML, CSS, and JavaScript to deliver optimal performance and smooth user interactions. The platform features a comprehensive course catalog system, advanced search and filtering capabilities, category-based navigation, and an intuitive interface optimized for accessibility and user engagement.

Key Achievements:

- Developed comprehensive course catalog & display system
- Implemented advanced search & filtering functionality
- Created category-based navigation for easy course discovery
- Built course detail pages with popular courses section
- Developed short courses showcase and topic/subject filtering
- Implemented course reviews system
- Created user authentication (Login/Apply) functionality

- Ensured responsive design with mobile-first approach
- Optimized for performance and accessibility (WCAG compliance)
- Implemented newsletter subscription feature
- Designed multi-level course organization system

Technologies: HTML5, CSS3, JavaScript (ES6+), Responsive Design, Vanilla JS, Modern CSS Features, Performance Optimization, Accessibility (WCAG)

Full Stack Developer

NightWalker | NightWalker

In Progress

A tech-enabled night logistics platform that provides secure and efficient delivery services between 5:00 PM and 10:00 PM, bridging the gap when most dispatch companies stop operations. The platform connects customers, vendors, and riders (NightWalkers) through mobile apps with real-time delivery requests, AI-optimized safe routing, live tracking, and in-app payments. Features advanced safety systems including AI Safe Route System, Emergency SOS buttons, real-time monitoring, and insurance-backed assurance for secure night-time logistics operations.

Key Achievements:

- Developed Customer App with delivery request, tracking, and scheduling functionality
- Implemented AI Safe Route System that selects safest and best-lit routes for night deliveries
- Built Emergency SOS Button system connected to 24/7 control room for instant emergency response
- Created real-time GPS tracking with live updates and estimated time of arrival (ETA)
- Integrated Paystack and Moniepoint payment gateways for seamless in-app payments
- Developed Rider App with account verification, safety training, and navigation features
- Built Rider Wallet System with earnings dashboard, commission tracking, and withdrawal management
- Implemented Night Mode Bonus system for riders completing deliveries after 9 PM
- Created Rider Safety Score system based on customer feedback, route behavior, and on-time delivery
- Developed Safe Rest Stations mapping for rider safety
- Built Admin Dashboard with live delivery tracking, route monitoring, and data analytics
- Implemented real-time rider risk monitoring and incident response system
- Created route optimization and demand forecasting using AI/ML integration
- Developed scheduled night deliveries and bulk delivery scheduler
- Implemented custom notifications (SMS and app alerts) for delivery updates
- Built vendor management system for business operations

Technologies: React Native, React, Node.js, Express.js, MongoDB, AI/ML Integration, Paystack API, Moniepoint API, Socket.io, Real-Time GPS Tracking, Push Notifications, Map Integration, Emergency Response Systems, Data Analytics

Technical Skills

Frontend Development

React, Redux, TypeScript, Tailwind CSS, jQuery, HTML, CSS, JavaScript, Next.js, Bootstrap, React-Bootstrap, Figma, Framer Motion, React Hook Form, Skeleton Screens, Recharts, Chart.js, React Query, Responsive Layouts, Material-UI (MUI)

Backend Development

Node.js, Express.js, Django, Python, RESTful APIs, Firebase, Clerk, Socket.io, External API Integration

Mobile Development

React Native, Expo, React Navigation, iOS Development, Android Development, App Store Deployment, Play Store Deployment, App Store Connect, Google Play Console, TestFlight, Code Signing, APK/AAB Builds, Store Listing Management, App Review Process

Database Management

MongoDB, PostgreSQL, MySQL, SQLite, Redis

State Management

Redux, Context API, Auth Context

Version Control & Collaboration

Git, GitHub, GitLab, Slack, Figma, ClickUp

CI/CD & Deployment

Vercel, Netlify, Render, GitLab CI/CD, GitHub Actions, Contabo, aaPanel, CPanel, Bitwise SSH, VPS Server Management

Payment Integration

Paystack API, Payment Gateway Integration

Other Tools & Libraries

Cloudinary, AJAX, IndexedDB, EmailJS, Toastify, Algorithms, SEO, Web Performance, UI/UX Design, CRUD Operations, Pagination, OAuth, Light/Dark Mode

Key Projects Summary

1. **NLSEE 2026** - High-performance event registration and management platform with QR verification
2. **ELRA Vendor Portal** - Government procurement and compliance management platform
3. **Alertpro** - Real-time intelligence and broadcast platform with Gemini AI integration
4. **JetOut Experience** - Event planning and booking platform with merchandise store
5. **Zamani Capital** - Digital financial services platform with lending and savings solutions
6. **School Bill Management System** - Multi-tenant financial management for educational institutions
7. **Payroll Management System** - Cloud-based SaaS payroll solution with Nigerian tax compliance
8. **TechXtro Store** - Modern e-commerce platform with Paystack integration and dark/light mode
9. **Skill Kernel** - Educational platform template for course providers
10. **NightWalker** - Tech-enabled night logistics platform with AI-optimized routing (In Progress)

Education

University of Ilorin, B.ENG (Hons), Mechanical Engineering

Lagos state model college Igbokuta, Ikorodu, Lagos state.

Glorylany nursery and primary school Ejigbo, Lagos state.

Certifications

Education & Certifications ● Django Framework Certification — Coursera, 2023. ● Diploma in Full Stack Web Development — Bluescripts, 2023. ● Diploma in Web & Graphics Design — Douglos Computer Institute, 2020–2021 . ● B.Eng. Mechanical Engineering — University of Ilorin, 2017.

Additional Information

- Strong problem-solving skills and ability to work in fast-paced environments
- Excellent communication and collaboration skills
- Experience working with cross-functional teams
- Passionate about writing clean, maintainable, and scalable code
- Continuous learner staying updated with latest technologies and best practices
- Experience with Agile/Scrum methodologies

This resume is generated from portfolio data. Last updated: March 2026
